

## EMERGENCY GENERATOR INSTALLED AT LIBRARY/COMMUNITY CENTER

On September 1, 2010 an emergency power generator was commissioned into service at the Library/Community Center. The building also serves as the primary shelter during emergencies. The 250kW Kohler generator was purchased through a \$30,000 grant from the Department of Public Utility and Control and Capital Improvement funds. The generator will be able to power the entire building in the event of a power failure.
